

Drop Deck / Elevating Platform Trailers
designed to load/unload at ground level and at dock height,
to safely expedite deliveries.

Lift-A-Load Elevating Platform Trailer

Ground & Dock Loading

for Safe, Fast, and Easy equipment deliveries

- Dependable hydraulic system gently lowers deck for ground level loading, and raises the deck to any dock height (up to 52") for fast, easy, and safe equipment unloading and loading.
- Tailgate/Ramp is operated by a winch to eliminate manual lifting and provide load angles between 6.5 and 9.5 degrees.
- Increase operator safety and reduce delivery times.
- Level loading at either ground level or dock height increases safety and avoids equipment damage.
- Trailer deck remains level at all times so payload safely stays in-place until secured for transportation.
- Ideal for handling scissor lifts, forklifts, floor scrubbers & sweepers, order pickers, pallet jacks, compactors, and static loads like safes – To name a few.

EXPEDITE
deliveries &
INCREASE
operator safety

**Level loading from
the ground, up to
52" Docks**

Lift-A-Load Models	Payload Capacity	GVWR	Trailer Weight	Total Length	Deck Length	Deck Width	Number of Wheels
EPT2-212	4,400 lbs.	7,200 lbs.	2,800 lbs.	22' 3"	12'	5' 10"	2
EPT4-314	7,500 lbs.	11,500 lbs.	4,000 lbs.	24' 6"	14'	5' 8"	4
EPT4-514	10,000 lbs.	14,600 lbs.	4,600 lbs.	24' 6"	14'	5' 8"	4
EPT4-715	15,000 lbs.	21,160 lbs.	6,160 lbs.	25' 8"	15'	5' 2"	4

LIFT-A-LOAD
ELEVATING PLATFORM TRAILERS

standard features

Adjustable Coupler

4 position coupler/ball hitch accommodates a variety of tow vehicle – Assuring a level trailer.

4-Degree Loading

No crown and a 4-degree loading angle (Lo Riser) allows easy loading of all low-ground clearance, and minimal ramp climbing-capable, equipment – Safely and quickly.

Construction

High Strength Low Alloy Steel (Lo Riser) for durability and assurance that the decking will not bow/sag over time. It also provides the best payload to trailer weight ratio - allowing more load capacity per GVWR.

Suspension System

Unique Rubber Suspension systems absorbs the energy from bumps and uneven roads to provide better control and a smoother ride than conventional trailers. Reducing travel stress on the tow vehicle & operator, trailer, and payload.

optional equipment

Winch

4,000 or 8,000 lb., 12V winch and mount is available to assist loading.

On-Board Power

(battery, charger, and maintainer) eliminates the need for a special connection to the tow vehicle for trailer operation.
