

Wing Jack Trailer

Efficient Delivery

Multiple Wing Jacks can be transported by one person - No pulling individual jacks to the flight-line.

Extend Jack Life & Reduce Maintenance Costs

Eliminate excessive wear and tear on jack wheels

Enhanced Safety

Trailer deck hydraulically lowers to ground level, providing a mere 3-degree loading angle. No ramps to deal with and Wing Jacks are easily pushed on and off the trailer.

Hydraulically Operated - Elevating Platform Trailer

Engineered specifically for the safe and efficient loading/unloading and transportation of aircraft wing jacks.

Wing Jack Trailers are designed for flight-line operations only. Trailers have no fenders, lights, or brakes and are not intended for over-the-road transport.

Standard Features:

- 2-1/2" (63.5 mm) Lunette Eye (Pintle) Hitch
- On-board Hydraulics to Move Trailer Deck from Travel Height, to Ground Level for Loading
- Hydraulic Controls on a 10' (3048 mm) Extension Cord
- Ground Level Loading - Trailer Deck at a 3-Degree Loading Angle
- No Ramps or Crowns
- On-Board 12-Volt Battery
- 110 Volt, 10-Amp Battery Maintainer
- Lockable Cover to Protect Hydraulics, Battery, and Battery Maintainer
- Built-in Tie-down Rails, Plus Six "D" Ring Tie-Downs
- HSLA Steel Construction
- 5,000 lb. (2268 kg) Tongue Jack
- Rear Gate with Locking-Pin
- Single, 7,000 lb. (3175 kg) Rated Axle
- 7-Watt Solar Battery Charger
- 4000 lb. (1814 kg) Cargo Winch
- Spare Tire and Mounting Bracket
- Primed and Painted Air Force Grey

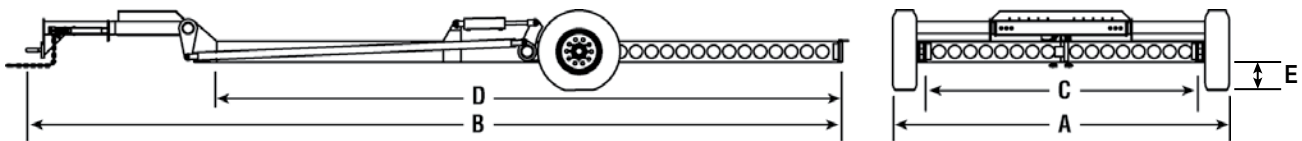

Secure Payloads - Integrated Tie-Down Rails, Plus 6 "D" Rings.

Easy Loading - 3/16" lip and a 3-Degree Loading Angle Plus, Payload Gate with Locking Pin.

Wing Jack Trailer P/N 12600

Dimensions:

A	10' 10"	(3302 mm)	Total Width
B	26' 0"	(7925 mm)	Total Length
C	8' 7"	(2616 mm)	Deck Width
D	20' 0"	(6096 mm)	Deck Length
E	11' 0"	(279 mm)	Deck clearance at transport height

Loads/Weights:

4,000 lb. (1814 kg)	Payload Capacity
4,020 lb. (1824 kg)	Trailer Weight
8,020 lb. (3638 kg)	GVWR
1,480 lb. (671 kg)	Total Tongue Load
